

OUTRAGEOUSLY INSPIRATIONAL LEADERSHIP™

GROUP + 1:1 COACHING PROGRAM

by VerticalReach Consulting Group, LLC

Elevate Your Leadership Beyond Natural Traits and Default Styles to Become Outrageously Inspirational

What OIL is

- A practical and personalized framework for effectively leading people, teams, and organizations drawn on decades of empirical research and applied practice in leadership, personality, motivation, and team dynamics
- Defining your values, ideal self, and a personally inspiring vision for your future as a leader
- Understanding and owning your natural leadership strengths and leadership diminishers
- Understanding what your team, stakeholders, and systemic organization need from you and each other to thrive and succeed
- Integrating the Seven Inspirational Leadership Styles and Five Inspirational Team Behaviors into yours and your team's authentic leadership agility
- Finding your distinct OIL voice in any given situation
- Becoming the inspiring and transformational leader you've always wanted to be

What OIL is not

- Being inauthentic or manipulative
- Changing your core personality
- Being blindly optimistic
- Becoming grandiosely charismatic

Who OIL is for

- C-level to mid-level leaders in any functional role or industry
- Recommended to be currently managing a team of at least 3 direct reports for at least one year
- Eager to grow as a leader and willing to experiment with new ways of connecting, leading, and influencing

Why OIL is needed

- Low employee engagement is costing the global economy \$8.9 Trillion annually (Gallup, 2024)
- Only 30% of managers and 23% of individual contributors report being fully engaged (Gallup, 2024)
- As much as 70% of managers are experiencing burnout, with mid-level leaders being the most affected (Gallup, 2024; Capterra, 2024; LinkedIn, 2024; Glassdoor, 2024)
- Inspirational motivation helps improve engagement and mitigate burnout (NIH, 2024)
- Because many organizations are outrageously great at fostering toxic cultures (MIT Sloan Management Review, 2022)
